# WALLSTICKER MOUNTING GUIDE

- HOW TO HANG WALLSTICKERS

## STEP BY STEP ...

### STEP 1

Use the plastic scraper to scrape across the transparent transfer sheet to ensure that the Wallsticker is completely fixed to the transparent transfer sheet. If desired, cut the sheet into separate stickers. Then you can place the elements where you wish.

### STEP 2

Carefully tear off the white paper sheet so that the Wallsticker is left on the transparent transfer sheet with the glue facing outwards. It can be an advantage to tear off vertically downwards in order for the Wallsticker to let go of the paper sheet more easily.

### STEP 3

Place the motive on the desired spot on the wall or any flat surface. Use the plastic scraper for the mounting. Begin at the middle of the motive scraping outwards.

### STEP 4

When you have ensured that the Wallsticker fastens completely to the wall, carefully tear off the transparent transfer sheet.

You can test if your wall is suitable for a Wallsticker with the little bird in this bag.

ENJOY!
